Wenling Saige Plumbing Equipment Co., Ltd.
Specialized in **Corrosion-Free ABS Faucets** for **Coastal Living** Since 2005
OEM/ODM Partner · 20+ Years Focus · Coastal Market Proven

Who We Are

Founded in 2005, Wenling Saige Plumbing Equipment Co., Ltd. is a specialized manufacturer of **mid-to-high-end corrosion-free ABS faucets**. We are not a general plumbing factory. For more than 20 years, we have focused on one mission: solving the corrosion problems that metal faucets cannot in coastal and high-humidity environments.

From premium ABS materials and precision mold design to surface finishing, ceramic cartridges, and EPDM seals, we have built a complete system around corrosion-free performance. Every product is engineered to stay new in salt-laden air, high humidity, and daily use—year after year.

Our faucets are trusted by brand partners and importers in more than 20 countries and regions, including coastal markets across South America, Southeast Asia, and beyond. With a 15,000-square-meter production facility and a team of over 60 professionals, we support OEM/ODM projects from concept to delivery.

We don't make a little of everything. We make one thing exceptionally well.

Manufacturing Capability

Our production facility is equipped with precision **injection molding machines**, **material preparation systems**, and **in-house mold maintenance capabilities**. Every step of the manufacturing process—from raw material preparation to final assembly—happens under our own roof and under our own control.

This vertical integration allows us to maintain consistent quality, respond quickly to design changes, and offer flexible production scheduling for both standard orders and custom OEM/ODM projects.

Our team includes more than 60 professionals across engineering, production, quality control, and sales. With more than two decades of focused ABS faucet manufacturing, we understand this material at a depth that generalist factories cannot match.

Products & Customization

Our product range is organized around complete coastal solutions, not isolated products. We manufacture ABS basin faucets, kitchen faucets, shower faucets, bath faucets, and related sanitary products—including shower sets, bidet sprayers, lifting rods, filters, floor drains,etc.

Our faucet series are built on a shared corrosion-free foundation, with multiple design languages available:

- **Classic Series** — practical cold-water faucets for everyday coastal use
- **European Series** — modern European design with hot and cold water control
- **Simple European Series** — streamlined simplicity for contemporary spaces
- **Square Series** — a new design language coming soon

We offer premium surface finishes, including **chrome**, **matte black**, **matte white**, and **molded-in colors**. As an OEM/ODM manufacturer, we support customization across form, surface finish, logo (mold engraving or laser marking), material configuration, and functional features. Custom molds are exclusive to the client and will never be used for other customers.

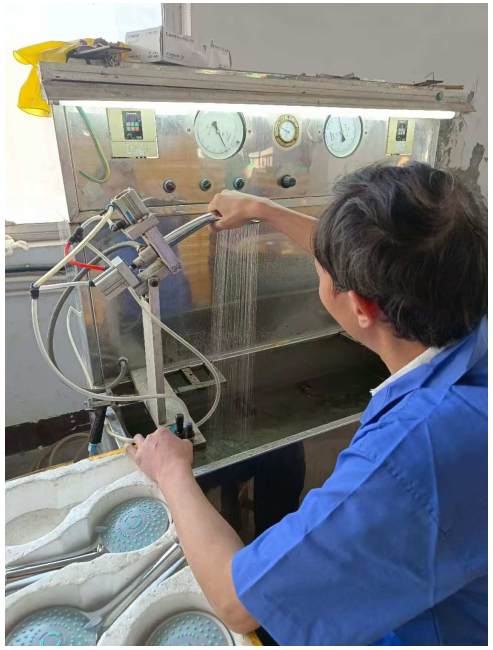

Quality Control

Quality is built into every stage of our production process—not inspected in at the end.

Our quality control system includes:

- **Incoming raw material inspection** to ensure material consistency and compliance
- **In-process checks** during molding and assembly to catch defects early
- **Salt spray testing** to verify corrosion resistance in coastal and high-humidity environments
- **Ceramic cartridge life testing**, validated to 500,000 switching cycles
- **Water pressure and sealing tests** on every batch before shipment

Every batch is documented and traceable. If an issue ever arises, we can identify the root cause quickly and take corrective action.

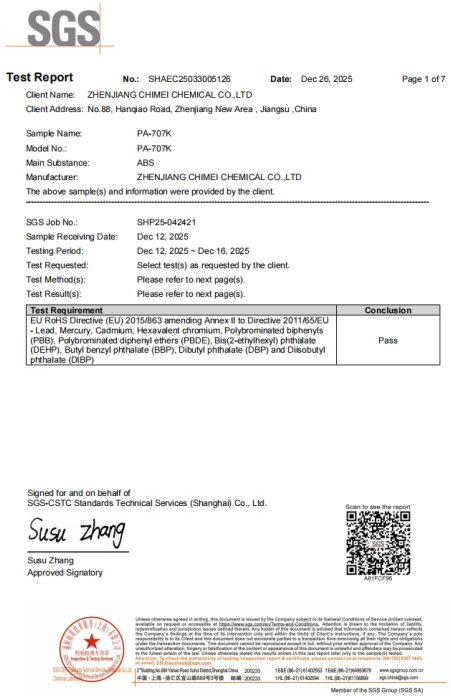

Certification & Compliance

We understand that market entry depends on documentation, not just product quality. That is why we maintain a compliance-ready approach across our materials and processes.

Our raw materials are selected with international regulatory requirements in mind, including **RoHS-compliant materials** and drinking water safety considerations. All water-contact components are free from lead, cadmium, and other heavy metals.

For brand partners pursuing market certification in their target regions, we provide technical documentation, material declarations, and testing support to help streamline the approval process. We recommend discussing certification requirements early in the cooperation, so we can factor them into material selection and product configuration from the start.

SGS

Test Report No.: SHAEC25033005126 Date: Dec 26, 2025 Page 1 of 7

Client Name: ZHENJIANG CHIMEI CHEMICAL CO.,LTD
Client Address: No.88, Hanqiao Road, Zhenjiang New Area , Jiangsu ,China

Sample Name: PA-707K
Model No.: PA-707K
Main Substance: ABS
Manufacturer: ZHENJIANG CHIMEI CHEMICAL CO.,LTD
The above sample(s) and information were provided by the client.

SGS Job No.: SHP25-042421
Sample Receiving Date: Dec 12, 2025
Testing Period: Dec 12, 2025 ~ Dec 16, 2025
Test Requested: Select test(s) as requested by the client.
Test Method(s): Please refer to next page(s).
Test Result(s): Please refer to next page(s).

Test Requirement	Conclusion
EU RoHS Directive (EU) 2015/863 amending Annex II to Directive 2011/65/EU - Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyls (PBB), Polybrominated diphenyl ethers (PBDE), Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyl phthalate (BBP), Dibutyl phthalate (DBP) and Diisobutyl phthalate (DIBP)	Pass

Global Reach

Our faucets are exported to more than **20 countries and regions** across **South America**, **Southeast Asia**, and beyond. This international experience has given us a deep understanding of different market requirements—from certification standards to packaging preferences.

We are especially experienced in serving coastal and high-humidity markets, where corrosion resistance is not a luxury but a necessity. Our products are already at work in coastal residential and hospitality projects worldwide, with a track record of fewer returns, fewer complaints, and stronger brand trust for our partners.

How We Work Together

We keep the process simple and transparent.

01. Inquiry
Send us your product requirements or design ideas. We respond within 24 hours.

02. Consultation
We discuss specifications, customization needs, target cost, and certification requirements—with a clear focus on your coastal market conditions.

03. Quotation & Design
We submit a formal quotation and technical proposal. For custom products, we prepare 3D drawings for your review.

04. Sampling & Approval
Pre-production samples are made according to approved drawings. You test, we adjust, until you are satisfied.

05. Production & Delivery
Mass production follows approved samples, with full quality control at every stage. We manage packing and shipping.

06. After-Sales Support
After delivery, our team remains available for technical support and future orders.

Inquiry → **Consultation** → **Quotation & Design** → **Sampling & Approval** → **Production & Delivery** → **After-Sales Support**
