Taizhou Huangyan Baoye Transportation Facilities Technology Co.,Ltd. is a company specializing in design and manufacturing various types of urban construction projects such as construction safety fences, guardrails, water horses, and isolation pier products. The company has a professional product design, mold development and product production team, and has first-class production equipment covering extrusion, blow molding, rotomolding, injection molding and other processes, and has the ability to design, manufacture and produce products required by customers.

The company strictly manages according to the ISO9001 quality management system, and is committed to providing high-quality safety facilities products to domestic and foreign cities. The company is based on the concept of integrity and win-win, and it is our company's goal to become the preferred supplier and permanent partner of customers.

The company adheres to the business philosophy of "honesty and trustworthiness, integrity and win-win"; the working principle of "excellence, customer first"; quality standards and goals of products with "adhering to industry standards, creating quality products of the era, pursuing excellent quality, striving for first-class industry".

Providing customers with quality products and perfect service is our commitment.
