Must-have Pruning Tools For Gardeners

Pruning is an important job in the garden - it helps to keep plants in shape, encourages the production of fruit and flowers and can help to prevent disease. So it's worth getting well kitted out with pruning tools. Having the right pruning tool for your tasks will make gardening easier and keep your garden healthier and better-looking.

Start with a high-quality, well-made cutting tool and keep it sharp and rust-free - clean cuts ensure your plants recover quickly and look better than ever. So what are the pruning tools every gardener needs in the shed? **Here's our list!**

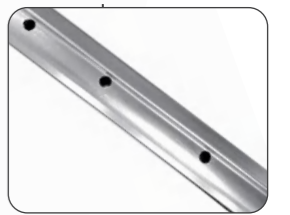

PRODUCT DESCRIPTION

HIGH CARBON STEEL BLADES

The non-stick coating reduces friction & protects against rust for long lasting use.

COMBINATION HANDLE OF STEEL & ALUMINIUM

Combination handle of high quality steel & aluminium makes it robust and durable, also lightweight and portable.

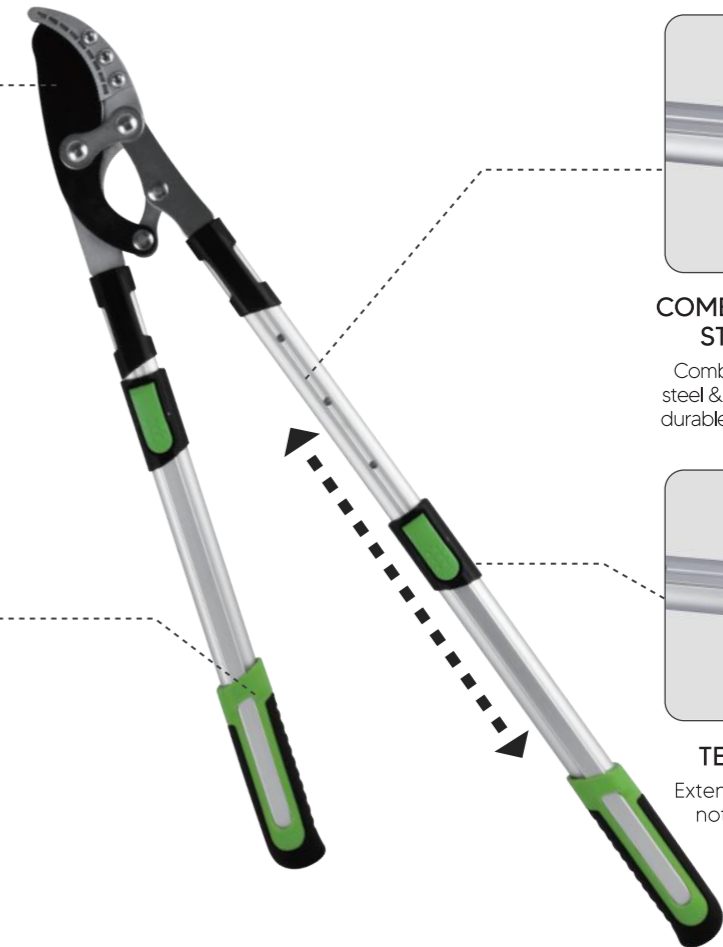

NON-SLIP COMFORTABLE HANDLE

Increase cutting force and hand friction, which can make cutting more labor-saving.

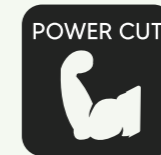

TELESCOPIC BUTTON

Extendable arms makes pruning not limited by the height of branches.

SPEED CUT - FAST AND VERSATILE

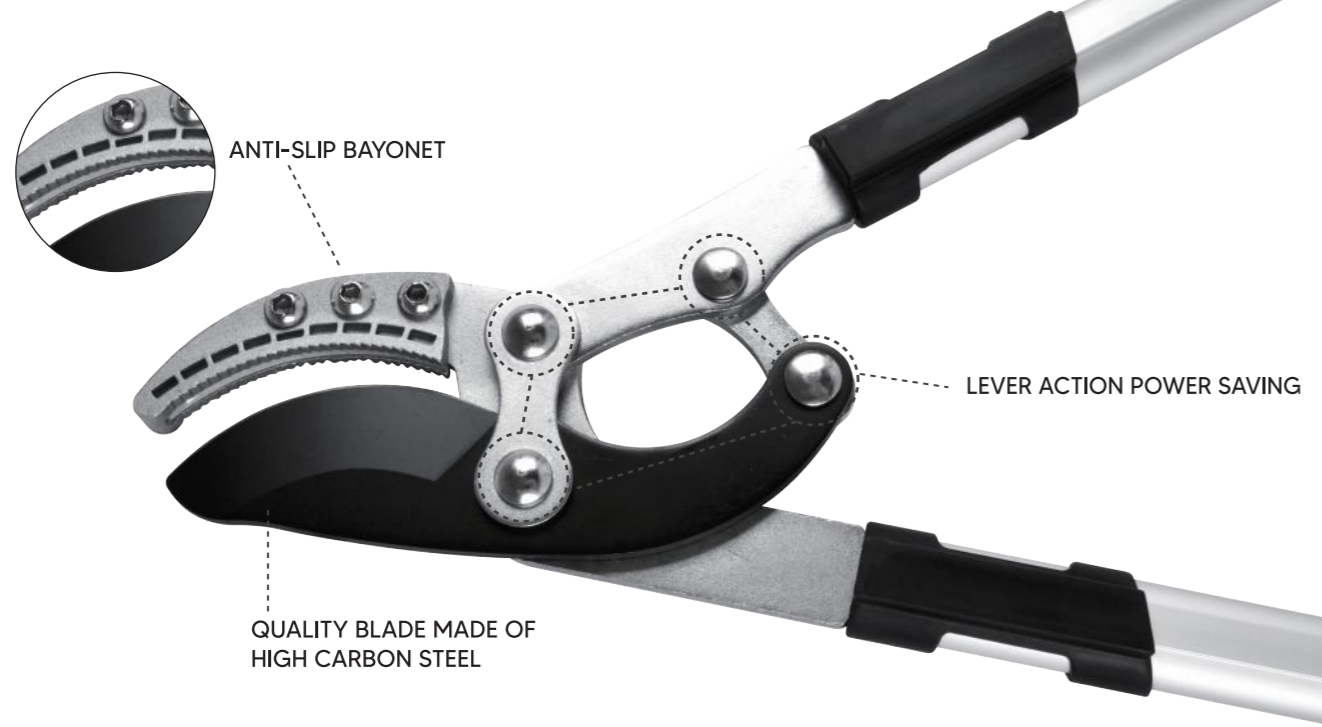

Small opening angle for comfortable working even in narrow places - and to cut thinner branches quickly one after the other.

POWER CUT -STRONG AND COMFORTABLE

Larger opening angle activates Power Cut mode for powerful work. Even thick knots up to 50 mm are cut "soft as butter" - the larger spreading angle and resulting greater leverage make it possible.

PRODUCT DESCRIPTION

**SK5 CARBON STEEL BLADES
RATCHET ACTION CUTTING**

SK5 carbon steel cutting blade gives lasting sharpness, the compound action blade of this branch cutter has multiple moving parts which multiplies the force applied to the blades 3 times!

**NON-SLIP
COMFORTABLE HANDLE**

Increase cutting force and hand friction, which can make cutting more labor-saving.

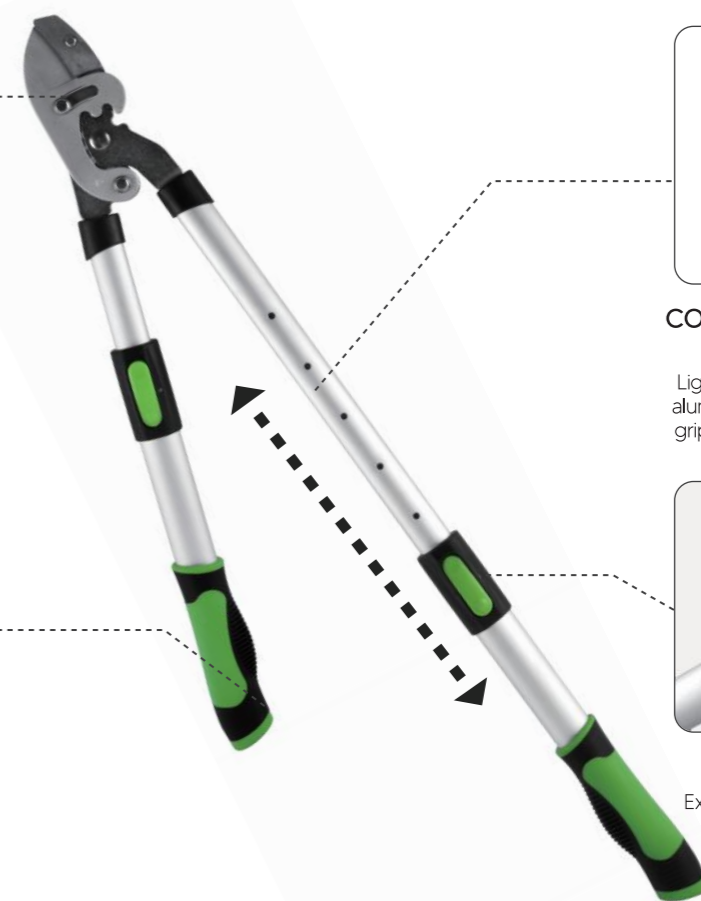

**COMBINATION HANDLE OF
STEEL & ALUMINIUM**

Light yet strong tubular telescopic aluminum handles, soft feel non slip grips for comfort, locking catch for safe storage.

TELESCOPIC BUTTON

Extendable arms makes pruning not limited by the height of branches.

48pcs	57*32*33cm	11.5/10.5kg

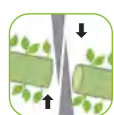

MULTIFUNCTIONAL GARDEN PRUNER

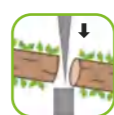

BYPASS OR ANVIL TECHNOLOGY?

When purchasing a pruner, it's important to choose the right style depending on what you're cutting

BYPASS

Both blade and counter blade press into the wood to make a clean cut with less compression damage (cutting blade passes counter blade in a scissors-like action). Possible to cut close to the stem. Best suitable for fresh wood.

ANVIL

Upper blade is forced through the wood with greater pressure as the anvil blade supports the branch and spreads the pressure until the cut is complete. Best suitable for dry or dead wood.

RATCHET & SINGLE CUT MODE

Ratchet cut
Ratchet mode with 4 short cuts
Cutting capacity: 24mm

Single cut
Single cut mode with 1 effort saving cut
Cutting capacity: 16mm

TG1301014-C
