Hexiangju Home Technology Co., Ltd. operates a full vertically integrated forestry industrial chain covering forest resource management, advanced deep wood processing, intelligent finished flooring manufacturing and brand operation. Built on sustained forestry development and vertical industrial expansion, we have completed the industrial upgrade from basic timber trade to R&D and production of high-end wood flooring. Guided by the tenet of “Based on renewable resources, led by sustainable development”, we strive to drive green, intelligent and branded high-quality growth of the home industry.

Our predecessor entered the forestry sector in 2000, focusing on forestry operation, timber trade and primary panel processing, accumulating rich experience in forest resource management. In 2019, we built professional production lines at Guolin Forestry Industrial Park by virtue of Suifenhe Border Port’s geographical advantages and stepped into large-scale operation. Overseas, four standardized timber processing bases are located in Primorsky Krai and Khabarovsk Krai, Russia, controlling hundreds of thousands of hectares of forests to guarantee stable premium timber supply. Domestically, we run a coordinated layout across Northeast China and Zhejiang: a 50,000 m² standard plant in the Northeast, a 10,000 m² production base and a 1,000 m² brand exhibition hall in Nanxun, Zhejiang, linking manufacturing closely with market demands.

Our smart manufacturing workshop processes 40,000 m³ of broadleaf hardwood and imports 20,000 m³ of high-grade panels yearly, equipped with 26 frame saws under full-process refined control, with an annual output value of RMB 150 million. Our five core businesses include cross-border small-sum import&export, wood processing & sales, wood products, flooring & furniture

distribution and general cargo road transport. We specialize in flooring veneers, timber for furniture, solid wood flooring, three-layer and multi-layer engineered wood flooring, all crafted from premium Russian logs and well-received nationwide.

We fulfill corporate social responsibilities by offering nearly 100 local jobs. Adhering to our core values — “Sincerity for clients, unity via goals, value through accountability, gratitude to society”, we cooperate with industrial peers to boost regional industrial efficiency.

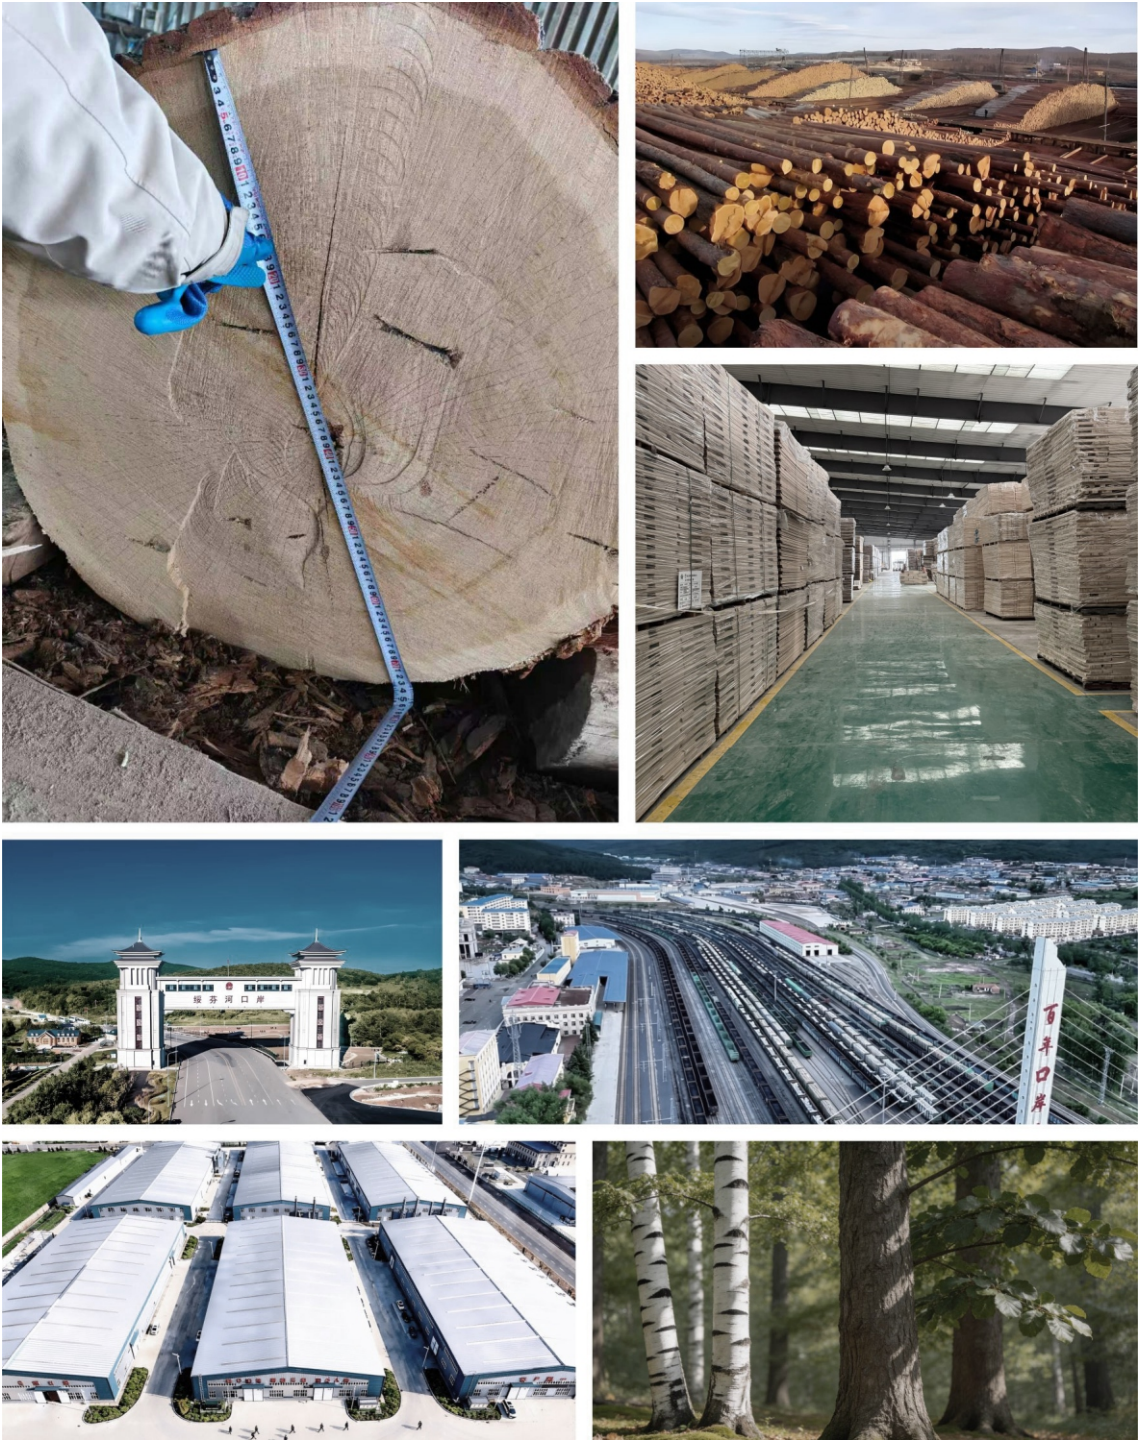

In 2026, we launched comprehensive brand development and unveiled our proprietary flooring brand ZINBAHR. Seizing border cooperation zone opportunities, we carry out capacity expansion and quality upgrading by optimizing production lines, updating automated equipment and deploying intelligent management systems. We develop domestic and overseas markets simultaneously, expecting annual output value over RMB 200 million and revenue exceeding RMB 160 million.

ZINBAHR adheres to the mission: “Select premium timber for trust, craft fine homes with devotion”. We establish a full-set standardized service system covering product quality, supporting accessories, style matching, installation and after-sales service. We aim to be consumers’ top flooring choice, a desirable workplace for practitioners and a trusted partner for collaborators, striving to become a top-tier flooring brand at home and abroad. Upholding ecological protection standards and exquisite craftsmanship, Hexiangju shares development achievements with all partners, customers and communities, and keeps delivering premium, eco-friendly living solutions for global households.

为信任选材 为美居深研

在一些科幻、神秘学或艺术创作的语境中。Zin”常被用作一个神秘而未知的符号或元素。它代表着尚未被揭示的秘密、等待人类去探索的领域。这种隐喻体现了人类对未知世界的好奇心和求知欲。

Bahr：意为“海”，象征知识的深邃、视野的广阔与能量的无穷。传递出一种包容万象、探索不息的品牌精神。

ZINBAHR：寓意永远对世界保持好奇，勇于探索未知领域。

In contexts of sci-fi, mysticism and artistic creation, the syllable "Zin" is often adopted as a mysterious, unknown symbol or motif. It stands for untold secrets and realms awaiting human exploration, embodying mankind’s curiosity and thirst for knowledge toward the unknown world.

"Bahr" means "sea", symbolizing profound knowledge, broad vision and boundless energy. It conveys the brand spirit of embracing all things and relentless exploration.

The compound name ZINBAHR carries the implication of always staying curious about the world and daring to venture into uncharted territories.

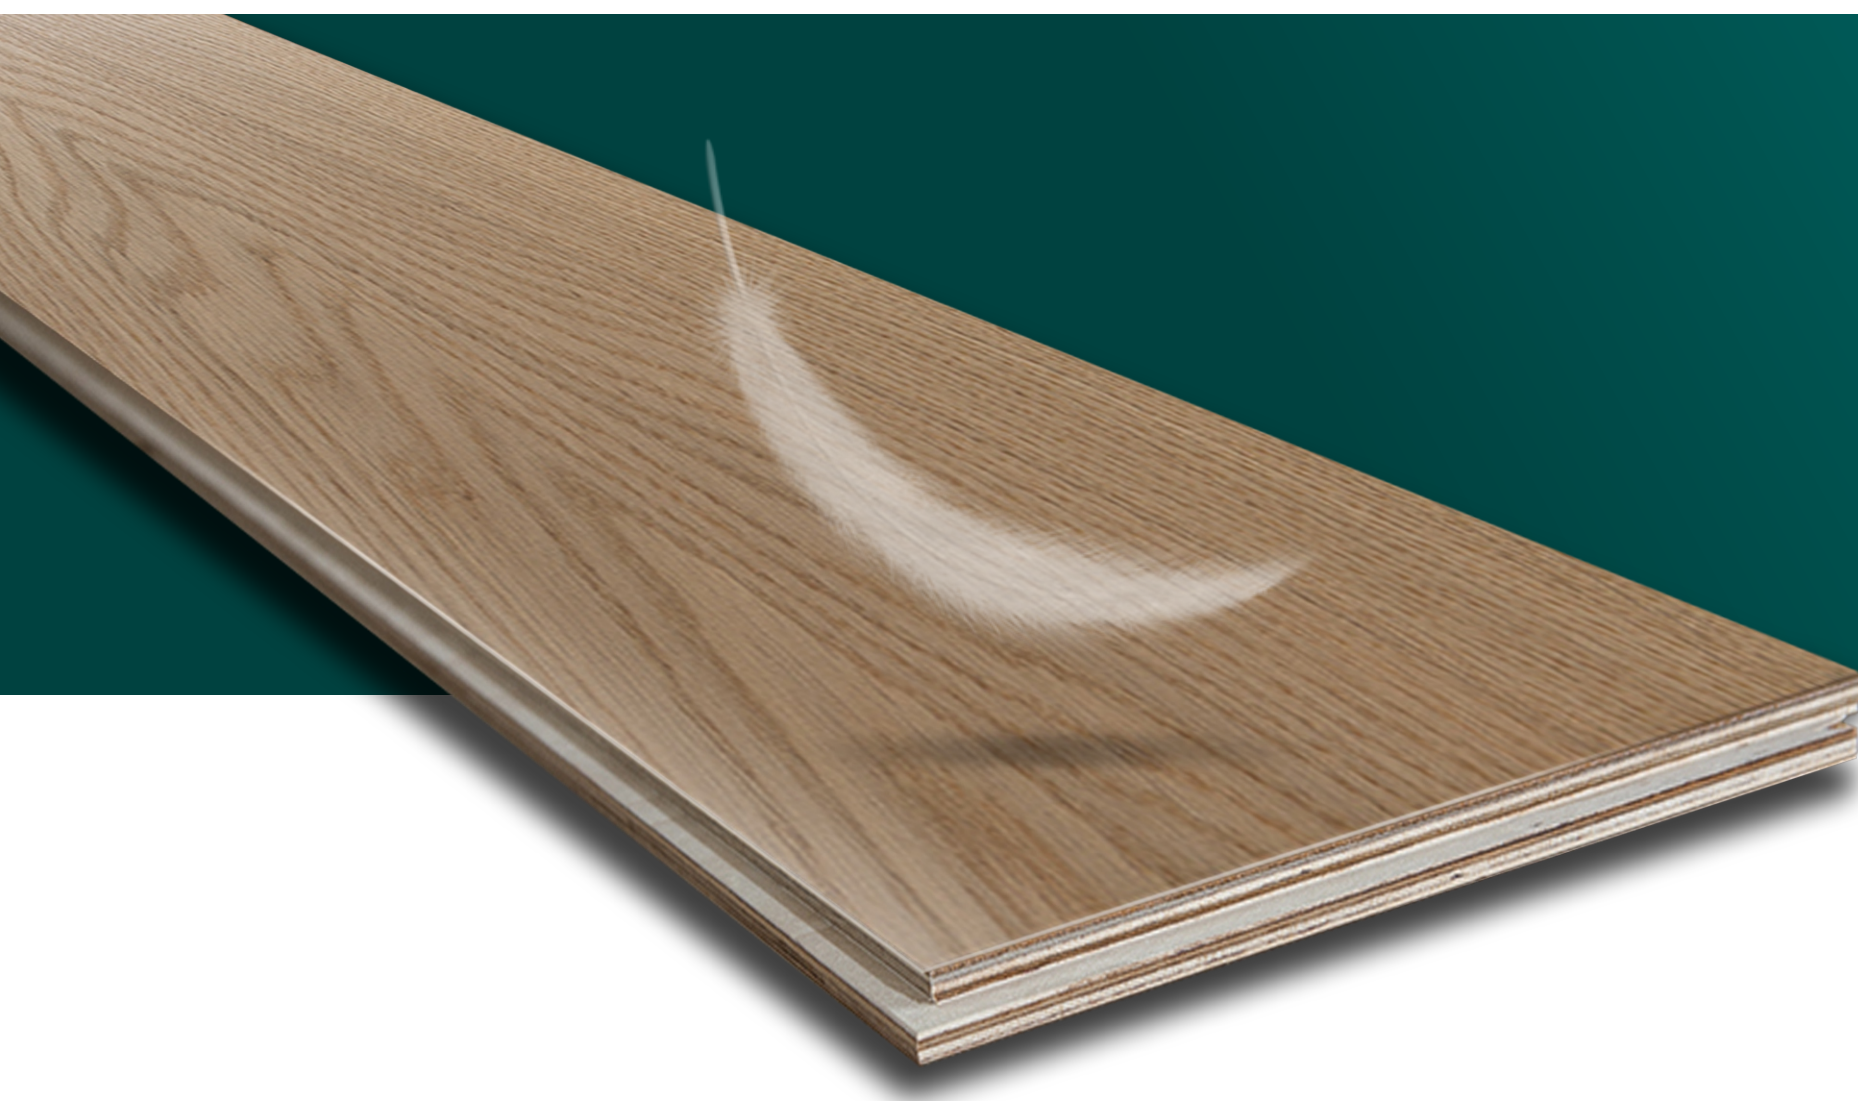

In 2026, the enterprise officially launched a brand-new layout for branded development, giving birth to its proprietary brand ZINBAHR. Seizing development opportunities brought by the construction of Suifenhe Border Economic Cooperation Zone, the company fully rolled out its capacity expansion and quality upgrading strategy, advancing production capacity growth, quality refinement and brand upgrading in tandem to achieve high-quality development.

Adhering to the corporate mission of Select Timbers for Trust, Refine Flooring for Fine Homes, ZINBAHR flooring has built a full-process standardized service system covering five core dimensions: product quality, auxiliary accessories, style matching, installation services and after-sales support.
